FIREBOX MEASUREMENTS

PLEASE PROVIDE THE FOLLOWING MEASUREMENTS TO HELP US FIGURE OUT TILE QUANTITIES

REQUIRED MEASUREMENTS

1 Back Wall Width
Width of the back wall from left to right.
_____ inches

2 Back Wall Height
Height from the firebox floor to the top of the back wall.
_____ inches

3 Side Wall Depth
Depth of each side wall (from the front opening to the back wall). If the sides are not the same, please provide both.
_____ inches

4 Floor Width
Width of the firebox floor at the front opening.
_____ inches

5 Floor Depth
Depth of the firebox floor (from the front edge to the back wall).
_____ inches

FIREBOX FLOOR ONLY (FLUSH WITH OPENING)

In this example the tile floor is only inside the firebox. Measure the floor width and depth as shown above.

FIREBOX FLOOR WITH HEARTH EXTENSION (EXTENDS INTO ROOM)

In this example the tile floor extends out into the room. Measure the floor width and depth including the hearth extension.

PLEASE NOTE

- Provide all measurements in inches.
- If the side walls are different depths, please provide both measurements.
- Include the hearth extension in the floor width and depth if it will be tiled (as shown above).
- These measurements help us calculate the quantity of tiles needed for the back wall, side walls and floor.

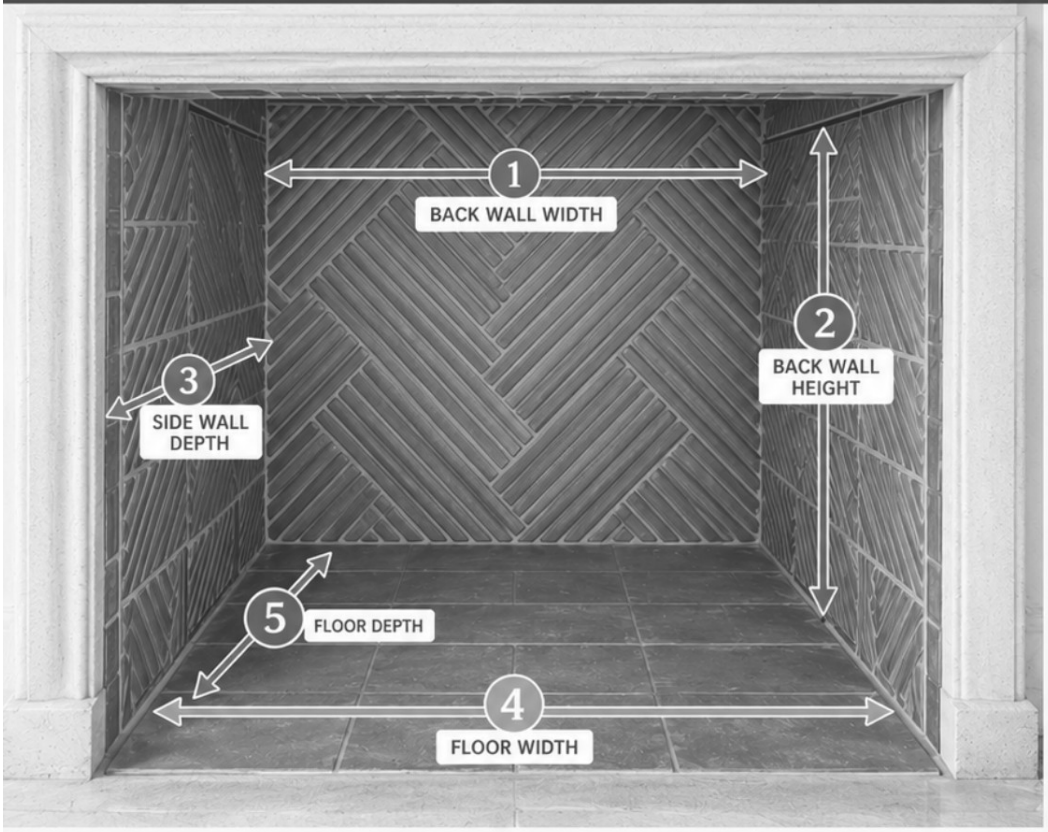

Send your measurements, with photos of your fireplace, through northernrooftiles.com/fireplace/ and we will work out your tile quantities.
